

**Squeegee Squad adheres to the following steps before and during the caulking repair of any building or window joints.**

- 1. Adhesion testing is to be completed with the assistance of the sealant manufactures representative. The manufacturer will then issue a warranty to the owner after the job is completed and inspected by the representative. This testing will also guarantee that the proper sealant is being applied to the existing substrate and if a primer is needed.**
- 2. The old sealant will be removed if recommended by the manufacturer.**
- 3. The glass and frame will be cleaned using a recommended cleaner such as denatured alcohol.**
- 4. The approved backer rod is installed in gaps to prevent 3 sided adhesion.**
- 5. Once the sealant is applied, it is tooled to assure adhesion.**
- 6. Squeegee Squad will check to make sure there aren't any holes or gaps in the sealant when finished.**

**Contact Squeegee Squad with any questions.**
